Re: Information Request for the PCB Waste Approval Renewal
Toxic Substances Control Act (TSCA)
Environmental Enterprises, Inc., Cincinnati, Ohio

Dear Ms. Hipp:

The U.S. Environmental Protection Agency issued an "Approval To Commercially Store Polychlorinated Biphenyls (PCBs)" to the Environmental Enterprises, Inc. (EEI) on September 21, 1995. The approval was issued to allow EEI to commercially store PCB wastes for disposal. The approval was expired on September 21, 2005. EEI submitted its "intent to continue the approval" on September 30, 2005.

Since the approval of the EEI for the storage of the PCB waste is expired, it is necessary for the EEI to initiate a renewal of the PCB storage approval.

The EEI should submit requested information for the renewal in accordance with 40 CFR § 761.77, Coordinated Approval. The information to be submitted to the EPA should include, but not be limited to, PCB storage capacity, type of PCB that EEI receives for the storage, RCRA permit and its related application, updated closure plan for PCB, updated financial assurance, comparisons of TSCA and RCRA requirements, public relationship issues, environmental justice concerns and information, description of PCB waste disposal process, and other pertinent information.

You can submit the required information in your convenient time, but please inform us the tentative submittal date.

If you have any questions, please contact Jae Lee of my staff, at (312)-886-3781.

Sincerely,

Mary S. Setnicar, Chief
RCRA/TSCA Programs Section
Land and Chemicals Division
